Developer account

LinkedIn

My first programming language was PASCAL and my first coding experience was XHTML/CSS 10 years ago. Not unlike the stereotype of a developer I enjoy video games, anime and not leaving my room. My interests range from volunteering, playing guitar, roller derby, learning german, listening to good music, and indulging in talks about conspiracy theories.

Experiences

June 2016- Present

iOS instructor at MakeSchool

(Teaching iOS development, OOP, swift, apps/games)
